DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-8 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 02/131819 (hereinafter reference will be made to the English language equivalent Nakamura et al US 2003/0195246 A1).

3. Nakamura et al discloses forming seamless soft capsule using a SPHEREX capsule filling machine. Applicants use the same apparatus in their example at page 20 of the specification. The capsule shell is gelatin with a plasticizer (paragraph 0032). The plasticizer includes glycerin or polyethylene glycol (paragraph 0033). The plasticizer is 5-5-50 parts by weight per 100 parts by weight gelatin (paragraph 0034), which is within the 20-70% by mass required by applicant. The capsule is by weight 20% shell and 80% filling and approximately 8.5 mm (see Example 1 and 2). The capsules are hardened in a coolant liquid, removed from the liquid, washed with a solvent (ethanol) and dried (Examples 1 and 2). The hardening liquid is an edible oil of medium chain triglyceride. Sorbitol (a gelling agent) is used at less than 10% by weight (paragraph 0035).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references are directed to making capsules.
